

Create Session for a Provisioned Number

This web request gives you the ability as the Reseller to retrieve a valid sessionKey for a provisioned line assigned to your organization.

Parameters

Parameter	Required	Description
api_key	TRUE	The key assigned to your organization.
phone_number	TRUE	The phone number assigned to your org.

Note: Web Request expects a GET request.

Sample Request

```
$curl -G https://provision.zipwhip.com/api/20140925/account/get-sessionkey \  
-d api_key={api_key} \  
-d phone_number={2065551212}
```

Sample Response

```
{  
  "success":true,  
  "response":"{session_key}"  
}
```
