Set Password

Change the current password for an account.

password/set

Exaple Request

```
$curl -G https://api.zipwhip.com/password/change
-d session={session}
--data-urlencode currentPassword={existingPassword}
--data-urlencode password={newPassword}
```

Example Response

```
{
  "response": "",
  "sessions": null,
  "success": true
}
```
