Sending Picture Messages (MMS)

Zipwhip now offers MMS on landline and toll free numbers. It is required at this time to have the feature enabled on the individual line.

Note: Sending is currently limited to one recipient.

Note: Sending is currently limited to MIME types:

- *image/bmp*
- *image/gif*
- *image/jpeg*
- *image/png*
- *text/plain*

Note: The parameter body is limited to 700 bytes greater than this should be sent as an attachment. Note: Payload size is currently limited to 600KB. No transcoding functionality is offered at this time. Note: A session is obtained from a user/login response. A session does not expire and therefore can be stored and used for all future requests.

Parameters

Parameter	Required	Description
session	True	Session is the response of user/login.
to	True	The recipient's phone number in E.164 format.
body	False	Text body of the message. Max 700 Bytes.
