Auto Reply API

Guide for interfacing with the Auto Reply Feature.

autoreply/install

Install Auto Reply on an account.

Syntax

```
POST /app/install HTTP/1.1
Host: https://api.zipwhip.com

?session=&appId=901&settings
```

The `appId` is specific to Auto Reply, the value is: `901`.

Example Request

```
$curl -X POST https://api.zipwhip.com/app/install \
    -d session={session} \
  -d appId=901 \
  --data-urlencode settings='{"enabled":true,"settings":[{"body":"We are currently close
```

Example Response

The key element in the response is the `installedAppId`, this ID allows the implementor to reference the Auto Reply app.

```
{
  "success":true,
  "response":{
    "appId":901,
    "appKey":"d2c_landline_advanced_autoreply",
    "installedAppId":36104,
    "settings":{
      "enabled":true,
      "settings":[
        {
          "enabled":true,
          "settings":[
            {
              "body":"We are currently closed. A representative is available Monday - Fr
              "title":"MorningAutoReply",
              "startDate":"2016-06-02T21:57:31-0700",
              "endDate":"",
              "enabled":true,
              "keywordEnabled":false,
              "times":[
                {
                  "startTime":"00:00",
                  "endTime":"23:59",
                  "day":"1",
                  "active":true
                },
                {
                  "startTime":"00:00",
                  "endTime":"07:59",
                  "day":"2",
                  "active":true
                },
                {
                  "startTime":"00:00",
                  "endTime":"07:59",
                  "day":"3",
                  "active":true
                },
                {
                  "startTime":"00:00",
                  "endTime":"07:59",
                  "day":"4",
                  "active":true
                },
                {
                  "startTime":"00:00",
                  "endTime":"07:59",
                  "day":"5",
                  "active":true
                },
                {
                  "startTime":"00:00",
                  "endTime":"07:59",
                  "day":"6",
                  "active":true
                },
                {
                  "startTime":"00:00",
                  "endTime":"23:59",
                  "day":"7",
                  "active":true
                }
              ]
            }
          ]
        }
      ]
    }
  }
}
```

autoreply/alter

Update an existing keyword or add additional Auto Reply.

At time of install, part of the response object is the `installedAppId`, this ID will be used for the `alter` request.

Syntax

```
POST /app/alter HTTP/1.1
Host: https://api.zipwhip.com

?session=&installedAppId=&settings
```

Example Request (Add New Auto Reply)

```
$curl -X POST https://api.zipwhip.com/app/alter \
    -d session={session} \
  -d installedAppId=36104 \
  --data-urlencode settings='{"enabled":true,"settings":[{"body":"We are currently close
```

Example Response (Add New Auto Reply)

```
{"success":true,"response":null}
```

Example Request (Remove Auto Reply)

```
$curl -X POST https://api.zipwhip.com/app/alter \
    -d session={session} \
  -d installedAppId=36104 \
  --data-urlencode settings='{"enabled":false,"settings":[]}'
```

Example Response (Remove Auto Reply)

```
{"success":true,"response":null}
```

autoreply/list

Retrieve current settings for Auto Reply.

Syntax

GET /app/list HTTP/1.1 Host: https://api.zipwhip.com

?session=

Example Request

```
$curl -G https://api.zipwhip.com/app/list \
    -d session={session} \
```

Example Response

```json
{
  "success":true,
  "response":{
    "apps":[
      {
        "appId":901,
        "appKey":"d2c_landline_advanced_autoreply",
        "installedAppId":36104,
        "settings":{
          "enabled":true,
          "settings":[
            {
              "body":"We are currently closed. A representative is available Monday - Fr
              "enabled":true,
              "endDate":"",
              "keywordEnabled":false,
              "startDate":"2016-06-02T21:59:50-0700",
              "times":[
                {
                  "active":false,
                  "day":"1",
                  "endTime":"23:59",
                  "startTime":"00:00"
                },
                {
                  "active":true,
                  "day":"2",
                  "endTime":"23:59",
                  "startTime":"17:00"
                },
                {
                  "active":true,
                  "day":"3",
